

The ICCEE project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 847040.

FINAL EVENT

ICCEE –Increasing cold chain energy efficiency in the European food and beverage sector

April 7, 2022– Wels, Austria

The aim of ICCEE is to bridge the inefficiencies in the cold supply chain stages, increasing the energy efficiency and the energy culture of food and beverage manufacturing industries, warehouses, cold storage and logistic operators. It has also enhanced the awareness towards energy efficiency and sustainable supply chain initiatives at every organisational level, from top management to operational staff.

ICCEE methodology - led by a group of industry, energy and IT experts -has developed a series of interrelated activities, which include a tailor-made tool for cold supply chains, and training courses to increase the supply chain energy efficiency in the food and beverage sector and implement real energy efficiency measures and investments.

Discover the methodology, tools, capacity building and practical experiences in food and beverage cold supply chains gained by attending the ICCEE final event and obtain the free toolbox for replication in your projects.

Agenda (N.B.: the hours might be adapted to an afternoon slot)

- | | |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9.30–9.35 | Warmer and moderation – Marine Faber Perrio, IEECP |
| 9.35–9.50 | ICCEE in short – Simone Zanoni, UNIBS |
| 9.50–10.05 | Easy to replicate - Energy Efficiency Measures in cold supply chains - Daniele Forni, FIRE |
| 10.05-10.20 | The other countable benefits (NEBs) – Lisa Neusel, FRAUNHOFER |
| 10.20 –10.30 | Energy efficiency and strategies in logistics and storage companies – Christine Weiker, Secretary General, European Cold Storage and Logistics Association (ECSLA) |
| 10.30–10.55 | Coffee break |
| 10.55–11.00 | Warmer - Marine Faber Perrio, IEECP |
| 11.00–11.15 | A tour to the ICCEE toolbox – Simon Hirzel, FRAUNHOFER |
| 11.15–11.30 | Capacity building, would you like to skill-up? – Francisco Puente, ESCAN |
| 11.30–11.45 | Introducing the IIN and its results – Maurizio Notarfonso, SPES/Federalimentare |
| 11.45 –11.55 | And now... what's next - exploiting the project results + policy recommendations – Marine Faber Perrio, IEECP |
| 11.55-12.00 | Conclusion – Simone Zanoni, UNIBS |
